CHAPTER 1: IMPORTANT SAFETY INSTRUCTIONS

1.1 BEFORE GETTING STARTED

It is the sole responsibility of the purchaser of Matrix Fitness Systems products to instruct all individuals, whether they are the end user or supervising personnel, on proper usage of the equipment.

It is recommended that all users of Matrix Fitness Systems exercise equipment be informed of the following information prior to its use.

1.2 PROPER USAGE

- Do not use the equipment in any way other than designed or intended by the manufacturer. It is imperative that all Matrix Fitness Systems equipment is used properly to avoid injury.
- Keep hands and feet clear of moving parts at all times to avoid injury.
- Unsupervised children must be kept away from this equipment.
- Do not wear loose clothing while on equipment.
- **(T3xi only)** When it is necessary to immobilize the treadmill, set the display to read "CHOOSE PROGRAM USING QUICK KEYS OR SPEED UP OR DOWN KEYS", then hold down the RESET & ENTER keys. The treadmill will now display "IMMOBILIZED." In this state the treadmill can not be operated; both the drive motor & elevation motor are disabled. The treadmill will remain in this state across power cycles, resets, etc. To return to normal operation mode repeat the same key sequence, hold down the RESET & ENTER keys. The display will now read "CHOOSE PROGRAM USING QUICK KEYS OR SPEED UP OR DOWN KEYS"

1.3 BEFORE GETTING STARTED

This Treadmill is intended for commercial use. To ensure your safety and protect the equipment, read all instructions before operating the MATRIX treadmill.

When using an electrical product, basic precautions should always be followed including the following:

DANGER: To reduce the risk of electric shock: Always unplug this equipment from the electrical outlet immediately after using and before cleaning.

WARNING: To reduce the risk of burns, fire, electrical shock or injury to persons that may be associated with using this product.

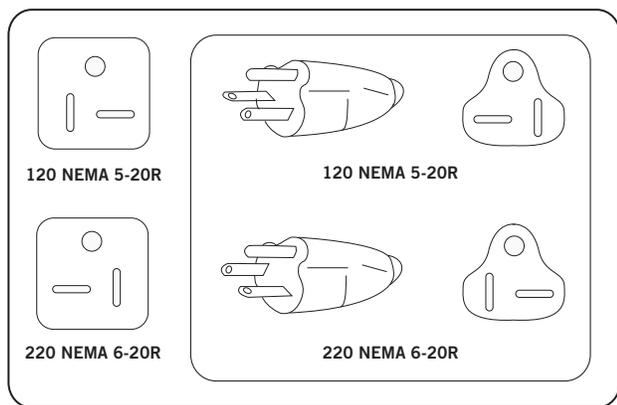

- An appliance should never be left unattended when plugged in. Unplug from outlet when not in use and before putting on or taking off parts.
- This product must be used for its intended purpose described in this lower case owner's manual. Do not use other attachments that are not recommended by the manufacturer. Attachments may cause injury.
- To prevent electrical shock, never drop or insert any object into any opening
- Do not remove the console covers. Service should only be done by an authorized service technician.
- Never operate the treadmill with the air opening blocked. Keep the air opening clean, free of lint and hair.
- Never operate product if it has a damaged cord or plug, if it is working properly, if it has been damaged, or immersed in water. Return the unit to a service center for examination and repair.
- Do not carry this unit by its supply cord or use the cord as a handle.
- Keep any power cord away from heated surfaces.
- Close supervision is necessary when treadmill is used by or near children or disable persons.
- Do not use outdoors
- Do not operate where aerosol (spray) products are being used or when oxygen is being administered.
- To disconnect, turn all controls to the off position, then remove plug from outlet.
- Connect this treadmill to a properly grounded outlet only.

CAUTION: If you experience chest pain, nausea, dizziness or shortness or breath, STOP exercising immediately and consult a physician before continuing.

CHAPTER 1: IMPORTANT SAFETY INSTRUCTIONS

1.4 ELECTRICAL REQUIREMENTS

For your safety and treadmill performance, the ground on this circuit must be non-looped. Please refer to NEC article 210-21 and 210-23. Your Treadmill is provided with a power cord with a plug listed below and requires the listed outlet. Any alterations of this power cord could void all warranties of this product.

1.5 GROUNDING INSTRUCTIONS

The treadmill must be grounded. If it should malfunction or breakdown, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. The treadmill is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. If the user does not follow these grounding instructions, the user could void the Matrix limited warranty.

DANGER: Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or serviceman if the user is in doubt as to whether the product is properly grounded. Do not modify the plug provided with the product if it will not fit the outlet; have a proper outlet installed by a qualified technician.

120V UNITS

The Matrix MX-T3x, MX-T3xi and MX-T5x 120 treadmill is for use on a nominal 120-volt circuit and has a non-looped grounding plug. Make sure that the 110V treadmill is connected to an outlet, NEMA 5-20R, having the same configuration as the plug. No adapter should be used with this product.

220V UNITS

The Matrix MX-T3x, MX-T3xi and MX-T5x 220 treadmill is for use on a nominal 220-volt circuit and has a non-looped grounding plug. Make sure that the 220V treadmill is connected to an outlet, NEMA 6-20R, having the same configuration as the plug. No adapter should be used with this product.

CHAPTER 2: PREVENTATIVE MAINTENANCE

2.1 RECOMMENDED CLEANING TIPS

1. Use a soft, clean cotton cloth. DO NOT use paper towels to clean surfaces on the treadmill. Paper towels are abrasive and can damage surfaces.
2. Use a mild soap and damp cloth. DO NOT use ammonia based cleaner. This will cause discoloring of the aluminum and plastics it comes into contact with.
3. Do not pour water or cleaning solutions on any surface. This could cause electrocution.
4. Wipe the console and side rails after every use.
5. Brush away any wax deposits from the deck and belt area. This is a common occurrence until the wax is worked into the belt material.
6. Be sure to remove any obstructions from the path of the elevation wheels including power cords.
7. Monthly, unplug the treadmill and remove the motor cover. Check for debris and clean with a dry cloth or small vacuum nozzle.
WARNING: Do not plug the treadmill in until the motor cover has been reinstalled.

CAUTION: The T3x/T3xi weighs 350 pounds, and the T5x Weighs 450 pounds. Be sure to have proper assistance to install and move the unit in order to avoid injury to you or the unit.

2.2 DECK AND BELT REPLACEMENT

One of the most common wear and tear items on a treadmill is the Deck and Belt combination. If these two items are not properly maintained they can cause damage to other components. This product has been provided with the most advanced maintenance free lubricating system on the market.

WARNING: Do not run the treadmill while cleaning the belt and deck. This can cause serious injury and can damage the machine.

Maintain the belt and deck by wiping the sides of the belt and deck with a clean cloth. The user can also wipe under the belt 2 inches on both sides removing any dust or debris.

The deck can be flipped and reinstalled or replaced by an authorized service technician. Please contact Matrix Fitness Systems for more information.

2.3 CHECK FOR DAMAGED PARTS

DO NOT use any equipment that is damaged or has worn or broken parts. Use only replacement parts supplied by Matrix Fitness Systems.

MAINTAIN LABELS AND NAMEPLATES. Do not remove labels for any reason. They contain important information. If unreadable or missing, contact Matrix Fitness Systems for a replacement.

MAINTAIN ALL EQUIPMENT Preventative maintenance is the key to smooth operating equipment, as well as keeping the users liability to a minimum. Equipment needs to be inspected at regular intervals. Defective components must be replaced immediately. Improperly working equipment must be kept out of use until it is repaired. Ensure that any person(s) making adjustments or performing maintenance or repair of any kind is qualified to do so. Matrix Fitness Systems will provide service and maintenance training at our corporate facility upon request or in the field if proper arrangements are made.

2.4 ADJUSTING THE BELT

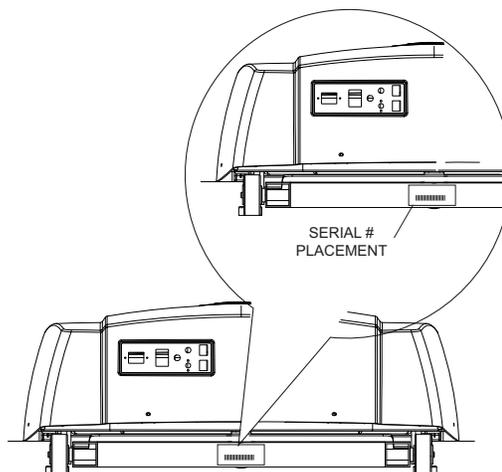

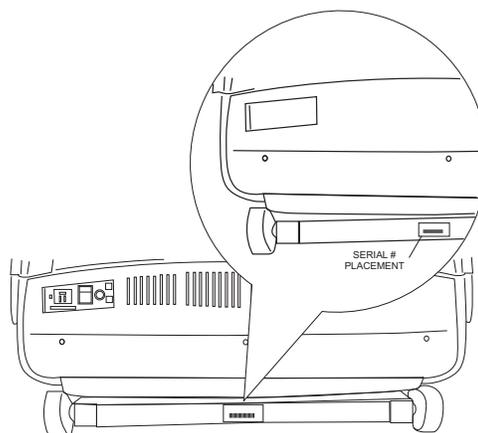

After placing the treadmill in the position it will be used, the belt must be checked for proper tension and centering. The belt might need to be adjusted after the first two hours of use. Temperature, humidity, and use cause the belt to stretch at different rates. If the belt starts to slip when a user is on it, be sure to follow the directions below.

- STEP 1** Locate the two hex head bolts on the rear of the treadmill. The bolts are located at each end of the frame at the back of the treadmill. These bolts adjust the rear belt roller. Do not adjust until the treadmill is on. This will prevent over tightening of one side.
- STEP 2** The belt should have equal distance on either side between the frame. If the belt is touching one side, do not start the treadmill. Turn the bolts counter clockwise approximately one full turn on each side. Manually center the belt by pushing the belt from side to side. Tighten the bolts the same amount as when the user loosened them, approximately one full turn. Inspect the belt for damage.
- STEP 3** While the treadmill is running at 3 mph, observe the belt position. If it is moving to the right, tighten the right bolt by turning it clockwise $\frac{1}{4}$ turn, and loosen the left bolt $\frac{1}{4}$ turn. If it is moving to the left, tighten the left bolt by turning it clockwise $\frac{1}{4}$ turn and loosen the right $\frac{1}{4}$ turn. Repeat Step 3 until the belt remains centered for several minutes.
- STEP 4** Check the tension of the belt. The belt should be very snug. When a person walks or runs on the belt, it should not hesitate or slip. If this occurs, tighten the belt by turning both bolts clockwise $\frac{1}{4}$ turn. Repeat if necessary.

2.5 MAINTENANCE LAMP (MX-T3x & MX-T3xi)

There is a maintenance lamp on the console to remind the owner to do the scheduled maintenance. When the treadmill's accumulated distance reaches 5000 miles, the maintenance lamp will light meaning maintenance is needed. The following is the maintenance lamp key:

- **Blue:** It means that the treadmill needs to be maintained. To turn off the maintenance light after performing service, hold the **INCLINE DOWN** and **SPEED DOWN** at the same time for 3 seconds.
- **Red:** It means that the treadmill might have a problem, and needs to be checked. Please contact MATRIX customer service.

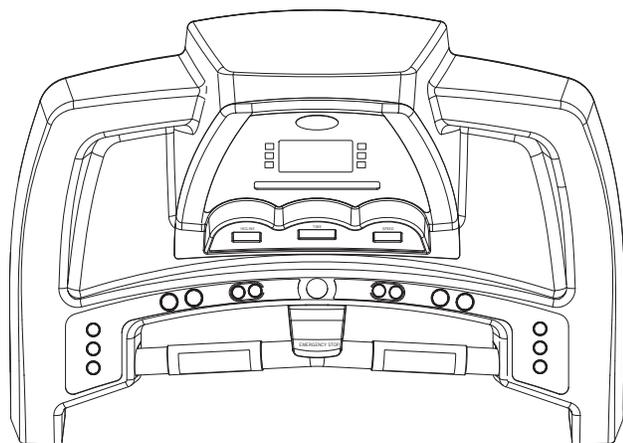

3.1 MX-T3x & T3xi TREADMILL**3.2 MX-T5x TREADMILL**

CHAPTER 4: MX-T3x / MX-T3xi OVERLAY DESCRIPTION / PROGRAMING / ENGINEERING MODE

4.1 MX-T3x CONSOLE DESCRIPTION

The MATRIX treadmill is inspected before it is packaged. It is shipped in four pieces: the base, the upright console supports, the handlebar and the console. Carefully unpack the unit and dispose of the box material.

CAUTION This unit weights 350 pounds. To avoid injury to the user and the unit, be sure to have proper assistance to remove and move the unit.

PROGRAM KEYS: Simple program view and selection buttons.
Six programs to choose from.

QUICK START/START: One touch Start and Quick Start.

SELECT: To confirm each program setting.

STOP: Press the STOP key once to pause the program for 2 minutes. During the 2 minute pause, press the QUICK START key to continue running the program, or else the machine will reset automatically. Also, you can press and hold the STOP key to reset the treadmill.

UP/DOWN ELEVATION: Easy information and elevation selection.

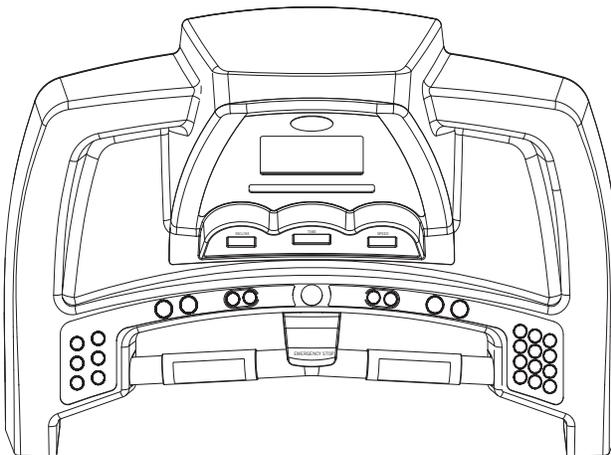

UP/DOWN SPEED: Easy information and speed selection.

EMERGENCY STOP: To stop all functions running.

MX-T3xi CONSOLE DESCRIPTION

The MATRIX treadmill is inspected before it is packaged. It is shipped in four pieces: the base, the upright console supports, the handlebar and the console. Carefully unpack the unit and dispose of the box material.

CAUTION This unit weights 350 pounds. To avoid injury to the user and the unit, be sure to have proper assistance to remove and move the unit.

PROGRAM KEYS: Simple program view and selection buttons.
Six programs to choose from.

QUICK START/START: One touch Start and Quick Start.

SELECT: To confirm each program setting.

STOP: Press the STOP key once to pause the program for 2 minutes. During the 2 minute pause, press the QUICK START key to continue running the program, or else the machine will reset automatically. Also, you can press and hold the STOP key to reset the treadmill.

UP/DOWN ELEVATION: Easy information and elevation selection.

UP/DOWN SPEED: Easy information and speed selection.

EMERGENCY STOP: To stop all functions running.

SPEED KEYS - NUMBERS: Press the Speed Keys' numbers to input program Time, Weight, and Target Heart Rate.

SPEED KEYS - RESET: To cancel the numbers entered by the Speed Keys numbers.

SPEED KEYS - ENTER: To confirm each program setting.

CHAPTER 4: MX-T3x / MX-T3xi OVERLAY DESCRIPTION / PROGRAMING / ENGINEERING MODE

4.2 MANUAL OPERATION

MATRIX design makes using the programs as easy as one touch of a button.

QUICK START

Press the "QUICK START" key and the LED will show "3", "2", "1", "GO!". The treadmill will start running from the lowest incline and 0.5 mph, with the default time counting down from 20 minutes.

MANUAL MODE allows you to enter desired time, level and weight.

- 1) Choose the "MANUAL" program using the program QUICK-KEYS, then press SELECT.
- 2) Choose the TIME using SPEED -/+, then press SELECT.
- 3) Choose WEIGHT using SPEED -/+, then press SELECT.
- 4) Press START.

4.3 OPERATING LEVEL BASED PROGRAMS

Your MATRIX Treadmill offers versatile programs to keep the user motivated. The following instructions will guide you through simple steps to select INTERVALS, WEIGHT LOSS (T3xi ONLY) & ROLLING (T3x ONLY) and 5K RUN programs.

INTERVAL & WEIGHT LOSS (T3xi ONLY) & ROLLING (T3x ONLY)

- 1) Choose the program using the program QUICK-KEYS, then press SELECT.
- 2) Choose the LEVEL using SPEED -/+, then press SELECT.
- 3) Choose the TIME using SPEED -/+, then press SELECT.
- 4) Choose WEIGHT using SPEED -/+, then press SELECT.
- 5) Press START.

5K RUN

- 1) Choose the "5K" program using the program QUICK-KEYS, then press SELECT.
- 2) Choose the LEVEL using SPEED -/+, then press SELECT.
- 3) Choose WEIGHT using SPEED -/+, then press SELECT.
- 4) Press START.

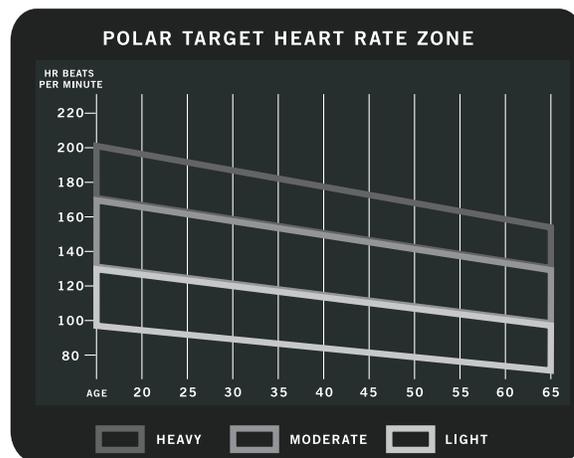

4.4 HEART RATE CONTROL

Follow these easy Steps to enter into the Heart Rate Program.

TARGET HR:

- 1) Choose the "TARGET HR" using the program QUICK-KEYS, then press SELECT.
- 2) Choose the "TARGET HART RATE" using the SPEED -/+, then press SELECT.
- 3) Choose your HR CONTROL MODE using the SPEED or INCLINE KEYS:
 - If SPEED -/+ is pressed the console will display "Speed HR Control, press - or + to set Max Speed, then press SELECT".
 - If INCLINE UP/DOWN is pressed the console will display "Incline HR Control, press up or down to set Max Incline, then press SELECT".
- 4) Choose TIME using SPEED -/+, then press SELECT.
- 5) Choose WEIGHT using SPEED -/+, then press SELECT.
- 6) Press START.

TARGET HEART RATE is determined by the following formula.
(220 Beats Per Minute - Age) Selected percentage.
Example (220 - 30) 65% = 123 Beats Per Minute.
Select from 50% - 80% in 5% increments.

CHAPTER 4: MX-T3x / MX-T3xi OVERLAY DESCRIPTION / PROGRAMING / ENGINEERING MODE

4.5 FIT TEST

FIT TEST allows you to measure your fitness based on a program designed specifically for your Matrix Treadmill. The test takes 5 minutes and is based on your heart rate. User should keep hands on contact heart rate straps.

Follow these easy steps to enter in the Fit Test Program.

STEP 1: Select the **FIT TEST** button.

STEP 2: Select **AGE** by using the **UP** or **DOWN** arrow keys. Press **SELECT** or wait 5 seconds.

STEP 3: Select **GENDER** by using the **UP** arrow keys. Press **SELECT** or wait 5 seconds.

STEP 4: Select **WEIGHT** by using the **UP** or **DOWN** arrow keys. Press **SELECT** or wait 5 seconds.

STEP 5: Display, **TIME**, Starting 3, Starting 2, Starting 1.

STEP 6: Display will read **"HOLD THE HANDGRIP SENSORS FOR DETECTING HR"** if no heart rate is found after 4:20. Display will read **"HR TO LOW, RETRY THE TEST"** if score is over 80.

STEP 7: Display will read results of fit test.

MEN'S OUTPUT TABLE FOR TEST #1 AND #2

AGE	EXCELLENT	GOOD	AVERAGE	FAIR	POOR
15-19	61+	56 ~ 61	52 ~ 57	48 ~ 51	42 -
20-29	57+	52 ~ 57	44 ~ 51	38 ~ 43	38 -
30-39	51+	48 ~ 51	40 ~ 47	34 ~ 39	34 -
40-49	48+	44 ~ 48	36 ~ 43	30 ~ 35	30 -
50-59	44+	40 ~ 44	32 ~ 39	25 ~ 31	25 -
60-69	21+	21 ~ 26	27 ~ 35	36 ~ 40	40 -
70-79	36+	32 ~ 36	23 ~ 31	17 ~ 22	17 -

WOMEN'S OUTPUT TABLE FOR TEST #1 AND #2

AGE	EXCELLENT	GOOD	AVERAGE	FAIR	POOR
15-19	52+	46 ~ 52	37 ~ 45	30 ~ 36	30 -
20-29	50+	44 ~ 50	35 ~ 43	28 ~ 34	28 -
30-39	48+	42 ~ 48	34 ~ 41	27 ~ 33	27 -
40-49	46+	41 ~ 46	32 ~ 40	25 ~ 31	25 -
50-59	42+	37 ~ 42	28 ~ 36	21 ~ 27	21 -
60-69	37+	32 ~ 37	24 ~ 31	17 ~ 23	17 -
70-79	33+	28 ~ 33	20 ~ 27	13 ~ 19	13 -

CHAPTER 4: MX-T3x / MX-T3xi OVERLAY DESCRIPTION / PROGRAMING / ENGINEERING MODE

4.6 ENGINEERING MODE

Engineering screens allow the viewing and editing of variables that would be necessary for a club operator/manager to customize. Unless otherwise noted, engineering screens consist of the initial screen, the editing or action screen, and the saving screen. The initial screen displays the variable type, and in most cases, the current value. Edit or action screens are where the editing of the variable(s) take place. The saving screen indicates the variable(s) is being saved.

To access the Engineering screens press and hold the **ELEVATION UP** and **SPEED DOWN** buttons for three seconds. The display will now display 'Engineering Mode'.

Use the **ELEVATION UP** or **DOWN** arrows to scroll through the different engineering screens.

Press **SELECT** to edit the selected engineering screen.

Use the **SPEED UP** or **DOWN** arrows to set the variable.

Press **START** to save the selected variable.

4.7 MANAGER SCREEN DESCRIPTIONS / DETAILS

Below is a list of the MX-T3x functions for each engineering screen. Exceptions will be noted in the description for each engineering screens:

- P0 LOW SPEED LEARN MODE (EDIT)**
This variable controls the low limit for the speed of the treadmill.
- P1 MIDDLE SPEED LEARN MODE (EDIT)**
This variable controls the middle limit for the speed of the treadmill.
- P2 HIGH SPEED LEARN MODE (EDIT)**
This variable controls the high limit for the speed of the treadmill.
- P4 LOW ELEVATION LEARN MODE (EDIT)**
This variable controls the low limit for the elevation of the treadmill.
- P5 HIGH ELEVATION LEARN MODE (EDIT)**
This variable controls the the high limit for the elevation of the tread mill.
- P6 UNIT (EDIT)**
Changes from Standard (Miles) to Metric (Kilometers).
Unit change will force unit dependent variables to revert to their default values.
- P7 LIMIT TIME (EDIT)**
This variable controls the program maximum time.
- P8 SET WEIGHT (EDIT)**
This variable controls the default weight used in the calorie calcula tions.
Sets to default on unit change.
Displayed in native units (kilogram or pounds)
- P9 TOTAL TIME**
Displays total accumulated time.
Accumulated time is not editable, for display only.
- P10 TOTAL DISTANCE**
Displays total accumulated distance.
Accumulated distance is not editable, for display only.
Displayed in native units (miles or kilometers).
- P11 VERSION**
Displays the product's software version.
Version is not editable, for display only.
- P12 LANGUAGE**
Language in which information is displayed.
- P13 USER SPEED**
This variable controls the default program speed.
- P14 USER TIME**
This variable controls the default program time.

CHAPTER 4: MX-T3x / MX-T3xi OVERLAY DESCRIPTION / PROGRAMING / ENGINEERING MODE

4.7 MANAGER SCREEN DESCRIPTIONS / DETAILS

Below is a list of the MX-T3xi functions for each engineering screen. Exceptions will be noted in the description for each engineering screens:

- P0 LOW SPEED LEARN MODE (EDIT)**
This variable controls the low limit for the speed of the treadmill.
- P1 HIGH SPEED LEARN MODE (EDIT)**
This variable controls the high limit for the speed of the treadmill.
- P2 MIDDLE SPEED LEARN MODE (EDIT)**
This variable controls the middle limit for the speed of the treadmill.
- P4 LOW ELEVATION LEARN MODE (EDIT)**
This variable controls the low limit for the elevation of the treadmill.
- P5 HIGH ELEVATION LEARN MODE (EDIT)**
This variable controls the the high limit for the elevation of the tread mill.
- P6 UNIT (EDIT)**
Changes from Standard (Miles) to Metric (Kilometers).
Unit change will force unit dependent variables to revert to their default values.
- P7 LIMIT TIME (EDIT)**
This variable controls the program maximum time.
- P8 USER TIME (EDIT)**
This variable controls the default program time.
- P9 SET WEIGHT (EDIT)**
This variable controls the default weight used in the calorie calcula tions.
Sets to default on unit change.
Displayed in native units (kilogram or pounds)
- P10 MACHINE (EDIT)**
Switches the machine settings from Johnson T8000 to a Matrix T3xi.
- P11 TOTAL TIME**
Displays total accumulated time.
Accumulated time is not editable, for display only.
- P12 TOTAL DISTANCE**
Displays the product's software version.
Version is not editable, for display only.
- P13 VERSION**
This variable controls the default program speed.
- P14 LANGUAGE**
Language in which information is displayed.
- P15 USER SPEED**
This variable controls the default program speed.

- USER SPEED**
- PRODUCT TEST**
- AUTO CHECK**

PRODUCT TEST

Test the product.

AUTO CHECK

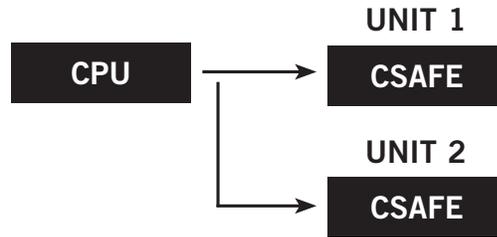

Run auto calibration to calibrate speed and incline after assembly or to recalibrate speed and incline values.

ADDRESS	DESCRIPTION	DEFAULT VALUE	MIN VALUE	MAX VALUE

NOTE: P0, P1 and P2 are auto start. The belt will start moving once the SELECT key is pressed. Once the value is saved press the ELEVATION UP Key to increase the engineering variable.

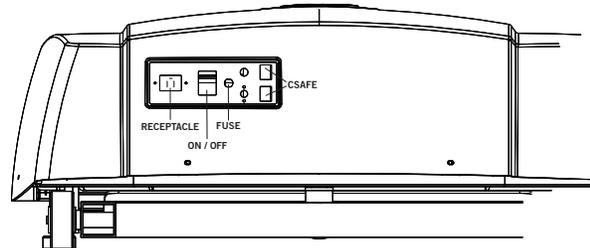

4.8 USING CSAFF

Matrix is the leader in entertainment availability.

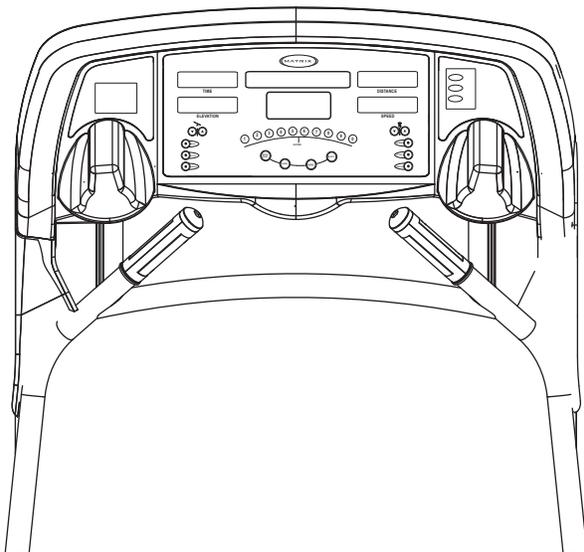

FRONT SIDE ACCESS LAYOUT

Below is a layout of the (backside) access panel on the MX-T3x/T3xi.

CHAPTER 5: MX-T5x OVERLAY DESCRIPTION / PROGRAMING / ENGINEERING MODE

5.1 CONSOLE DESCRIPTION

PROGRAMS: Simple program view and selection buttons. Seven programs to choose from.

START/QUICK START: One touch Start and Quick Start

SELECT: Quick entry of information and level selection.

PAUSE/HOLD TO RESET: Stop/Pause and hold for 3 seconds to reset.

CLEAR: Clears number keypad entry.

UP/DOWN ELEVATION: Easy information and elevation selection.

UP/DOWN SPEED: Easy information and speed selection.

5.2 MANUAL OPERATION

MATRIX design makes using the programs as easy as one touch of a button.

QUICK START Start pedaling and press **QUICK START** to begin workout.

MANUAL MODE allows you to enter desired time, level and weight.

- STEP 1** Select **MANUAL** program button on left of panel.
Press **SELECT** or wait 5 seconds.
Selecting **START** will start program.
- STEP 2** Select **TIME** by using the **UP** or **DOWN** arrow keys.
Press **SELECT** or wait 5 seconds.
Select **START** will start program.
- STEP 3** Select **LEVEL** by using **UP** or **DOWN** arrow keys. You can change the level at any time during workout.
Press **SELECT** or Wait 5 seconds.
Select **START** will start program.
- STEP 4** Select **WEIGHT** by using the **UP** or **DOWN** arrow keys.
Press **START** or **SELECT** to begin workout.
Display, **TIME**, Starting 3, Starting 2, Starting 1

CHAPTER 5: MX-T5X OVERLAY DESCRIPTION / PROGRAMING / ENGINEERING MODE

5.3 OPERATING LEVEL BASED PROGRAMS

Your **MATRIX** treadmill offers versatile programs to keep the users motivated. The following instructions will guide you through simple steps to select INTERVALS, ROLLING, and RANDOM programs.

- STEP 1** Select the **PROGRAM** button on left of panel.
Press **SELECT** or wait 5 seconds.
Selecting **START** will start program.
- STEP 2** Select **TIME** by using the **UP** or **DOWN** arrow keys.
Press **SELECT** or wait 5 seconds.
Select **START** will start program.
- STEP 3** Select **LEVEL** by using **UP** or **DOWN** arrow keys.
Press **SELECT** or Wait 5 seconds.
Select **START** will start program.
- STEP 4** Select **LEVEL** by using **UP** or **DOWN** arrow keys. You can change the level at any time during workout.
Press **SELECT** or Wait 5 seconds.
Select **START** will start program.
- STEP 5** Select **WEIGHT** by using **UP** or **DOWN** arrow keys.
- STEP 6** Press **START** or **SELECT** to begin workout.
Display, **TIME**, Starting 3, Starting 2, Starting 1

5.4 HEART RATE CONTROL

For your convenience, MATRIX Treadmills come standard with digital contact heart rate sensors and are POLAR telemetry compatible.

Locate the metal sensors on the handrail of the treadmill. Notice there are two separate pieces of metal on each grip. You must be making contact on both pieces of each grip to get an accurate heart rate reading. You can grab these sensors in any program to view your current heart rate.

Heart Rate Program
Follow these easy Steps to enter into the Heart Rate Program.

- STEP 1** Select the **TARGET HR** program button.
- STEP 2** Select **TIME** by using the **UP** or **DOWN** arrow keys. When finished press **SELECT** or wait 5 seconds.
- STEP 3** Select **AGE** by using the **UP** or **DOWN** arrow keys. When finished press **SELECT** or wait 5 seconds.
- STEP 4** Select **PERCENTAGE OF MAXIMUM HEART RATE** by using the up or down arrow. Percentage of maximum heart rate is determined by the following formula. $(220 \text{ Beats Per Minute} - \text{Age}) \times \text{Selected percentage}$. Example $(220 - 30) \times 65\% = 123 \text{ Beats Per Minute}$.
- STEP 5** Select from 50% - 80% in 5% increments.
SELECT HR program type by using the **UP** or **DOWN** arrow keys select the active variable Speed or Elevation that will be used to control the users heart rate. Press **SELECT** or wait 5 seconds.
- STEP 6** Select **MAXIMUM SPEED/ELEVATION** by using the **UP** or **DOWN** arrow keys select the active variable Maximum Speed or Elevation that will be used to control the users heart rate.
- STEP 7** Press **START**.

HEART RATE SAFETY PROTOCOLS:

(Polar target heart rate zone chart is on pg 11)

When the users heart rate exceeds the target heart rate by the values, the following prompts will take place:

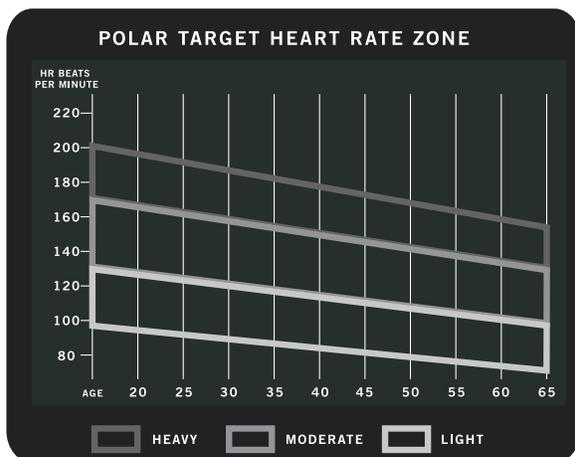

10BPM: Warning in alpha numeric indicating active variable will be reduced (if above min.) or alternate variable will be reduced.

20BPM: Active variable (if above min.) or alternate variable, if active variable is at zero, reduced by 30%.

15BPM: Warning indicating heart rate over maximum and program will end.

20BPM: Program ends.

CHAPTER 5: MX-T5x OVERLAY DESCRIPTION / PROGRAMING / ENGINEERING MODE

5.5 FIT TEST

FIT TEST allows you to measure your fitness based on a program designed specifically for your Matrix Treadmill. The test takes 5 minutes and is based on your heart rate. User should keep hands on contact heart rate grips.

Follow these easy steps to enter in the Fit Test Program.

- STEP 1:** Select the **FIT TEST** button.
- STEP 2:** Select **AGE** by using the **UP** or **DOWN** arrow keys. Press **SELECT** or wait 5 seconds.
- STEP 3:** Select **GENDER** by using the **UP** arrow keys. Press **SELECT** or wait 5 seconds.
- STEP 4:** Select **WEIGHT** by using the **UP** or **DOWN** arrow keys. Press **SELECT** or wait 5 seconds.
- STEP 5:** Display, **TIME**, Starting 3, Starting 2, Starting 1.
- STEP 6:** Display will read **"HOLD THE HANDGRIP SENSORS FOR DETECTING HR"** if no heart rate is found after 4:20. Display will read **"HR TO LOW, RETRY THE TEST"** if score is over 80.
- STEP 7:** Display will read results of fit test.

MEN'S OUTPUT TABLE FOR TEST #1 AND #2

AGE	EXCELLENT	GOOD	AVERAGE	FAIR	POOR
15-19	61+	56 ~ 61	52 ~ 57	48 ~ 51	42 -
20-29	57+	52 ~ 57	44 ~ 51	38 ~ 43	38 -
30-39	51+	48 ~ 51	40 ~ 47	34 ~ 39	34 -
40-49	48+	44 ~ 48	36 ~ 43	30 ~ 35	30 -
50-59	44+	40 ~ 44	32 ~ 39	25 ~ 31	25 -
60-69	21+	21 ~ 26	27 ~ 35	36 ~ 40	40 -
70-79	36+	32 ~ 36	23 ~ 31	17 ~ 22	17 -

WOMEN'S OUTPUT TABLE FOR TEST #1 AND #2

AGE	EXCELLENT	GOOD	AVERAGE	FAIR	POOR
15-19	52+	46 ~ 52	37 ~ 45	30 ~ 36	30 -
20-29	50+	44 ~ 50	35 ~ 43	28 ~ 34	28 -
30-39	48+	42 ~ 48	34 ~ 41	27 ~ 33	27 -
40-49	46+	41 ~ 46	32 ~ 40	25 ~ 31	25 -
50-59	42+	37 ~ 42	28 ~ 36	21 ~ 27	21 -
60-69	37+	32 ~ 37	24 ~ 31	17 ~ 23	17 -
70-79	33+	28 ~ 33	20 ~ 27	13 ~ 19	13 -

CHAPTER 5: MX-T5x OVERLAY DESCRIPTION / PROGRAMING / ENGINEERING MODE

5.6 ENGINEERING MODE

Manager screens allow the viewing and editing of variables that would be necessary for a club operator/manager to customize. Unless otherwise noted manager screens consist of the initial screen, the editing or action screen and the saving screen. The initial screen displays the variable type and in most cases the current value. Edit or actions screens are where the editing of the variable take place. The saving screen indicates the variable is being saved.

To access the Manager Settings press and hold the **ELEVATION DOWN** and **SPEED UP** buttons for three seconds.

Use the **ELEVATION** or **SPEED UP** and **DOWN** arrows to scroll through the different manager setting.

Press **SELECT** to edit the selected manager setting.

Use the **ELEVATION** or **SPEED UP** and **DOWN** arrows to set the variable.

Press **START** to save the seected variable.

NOTE: **SAVING** all appear in the 7 segment window when the variavle is being saved to memeoery.

5.7 MANAGER SCREENS EXCEPTIONS/DETAILS

Below is a list of functions for each Manager Setting. Exceptions will be noted in the description for each manager setting:

- P0 MAXIMUM TIME (EDIT)**
This variable controls the program maximum time.
Active variable display in the time seven segment display.
Numeric entry is active.
- P1 DEFAULT TIME (EDIT)**
This variable controls the default program time.
Active variable displayed in the time seven segment display.
Numeric entry is active.
- P2 DEFAULT LEVEL (EDIT)**
This variable controls the default program level (may be eliminated in final product).
Active variable displayed in the time seven segment display.
Numeric entry is active.
- P3 DEFAULT AGE (EDIT)**
The variable controls the default users age used in the goal heart rate calculations.
Active variable displayed in the time seven segment display.
Numeric entry is active.
- P4 DEFAULT WEIGHT (EDIT)**
This variable controls the default users age used in the calorie calculations.
Active variable displayed in the time seven segment display.
Displayed in native unites (kilogram or pounds)
Numeric entry is active.
- P5 ACCUMULATED DISTANCE**
This variable displayed in the time seven segment disply.
Accumulated distance is not editable, for display only.
Displayed in native unites (kilometers or miles)
Holding the start key resets the accumulated distance.
- P6 ACCUMULATED TIME**
This variable displayed in the time seven segment disply.
Accumulated time is not editable, for display only.
Holding the start key resets the accumulated distance.
- P7 SOFTWARE VERSION**
Active variable displayed in the time seven segment display.
Accumulated distance is not editable, for display only.
- P8 START SPEED (EDIT)**
Controls the starting speed for all programs (minimum speed not affected).
Active variable displayed in the time seven segment display.
Displayed in native unites (kilometers per hour or miles per hour).
Reverts to default value on unit change.
Numeric entry is active.
- P9 MAXIMUM SPEED (EDIT)**
Controls the maximum speed for all programs.
Active variable displayed in the time seven segment display.
Displayed in native unites (kilometers per hour or miles per hour)
Reverts to default value on unit change.
Numeric entry is active.

CHAPTER 5: MX-T5x OVERLAY DESCRIPTION / PROGRAMING / ENGINEERING MODE

P10 DEFAULT CHANNEL (EDIT)

Controls the default channel for entertainment CSAFE compativle devices.
This variable is editable.
Numeric entry is active.

P11 DEFAULT VOLUME (EDIT)

Controls the default channel for entertainment CSAFE compativle devices.
This variable is editable.
Numeric entry is active.

P13 SPEED MODE (EDIT)

Changes from Standard (Miles) to Metric (kilometers).
Unit change will force unit dependent variables to revert to their default values.

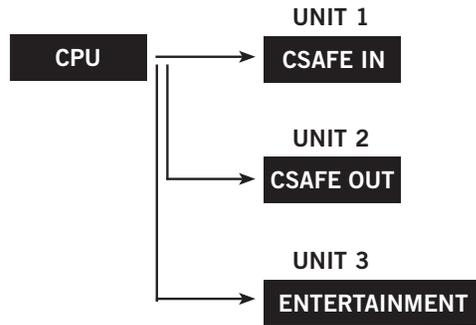

P14 OUT OF ORDER (EDIT)

VARIABLE	MINIMUM DEFAULT	FACTORY	MAXIMUM	STEP SIZE	UNITS
Maximum Time	5	20		5	minutes
Default Time	1	20	95	5	minutes
Default Level	80	1	NV max time	1	
Default Weight	15	150	20	5	pounds
Default Age	0.5	30	400	1	years
Start Speed	2	1	100	0.1	mph
Maximum Speed	T4	12	2	0.1	mph
Machine Type	OFF	T4	12	1	Unit
IR On/Off	1	ON	T5	1	Unit
Default Channel	1	1	ON	1	
Default Volume		16	30	1	
Speed Mode			30		
Out of Order					

5.8 USING CSAFE

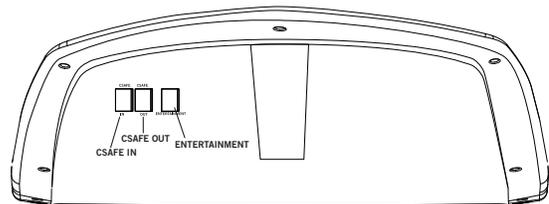

Matrix is the leader in entertainment availability. On the back of the console are three RJ45 receptacles. They are marked CSAFE IN, CSAFE OUT, and ENTERTAINMENT.

Use the csafe in to plug in an csafe device using the RJ45 connector csafe out allows csafe products to be daisy chained together from one unit to the next. The connection is as follows;

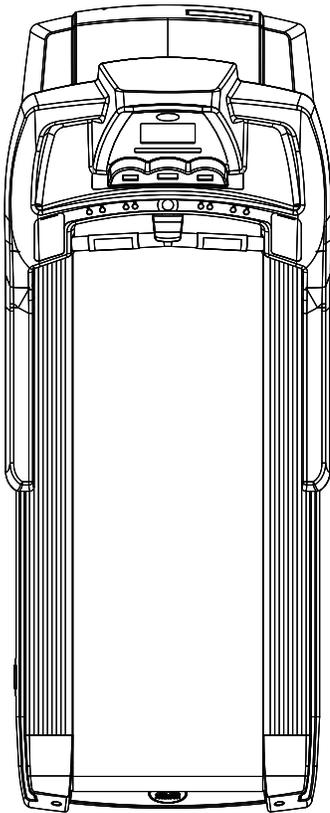

CONSOLE (BACK SIDE) ACCESS LAYOUT

Below is a layout of the (backside) console access panel on the MX-T5x .

CHAPTER 6: MX-T3x / T3xi TREADMILL SPECIFICATIONS, PARTS, AND ASSEMBLY GUIDES

6.1 MX-T3x / MX-T3xi MODEL SPECIFICATIONS

SPECIFICATIONS

Foot Print	inches = 85" x 34" x 55" cm = 216 x 87 x 140
Weight	350 lbs kg
Max User Weight	400 lbs = 181 kg
Belt Type	Habisat
Frame Construction	Steel
Running Area	20" x 60"
Incline Range	0-15%
Speed Min.	0.5
Speed Max.	12
Motor Type	3.2 HP DC
Controller Cooling Fan	Yes
Electrical Receptacle	120 NEMA 5-20R
Electrical Plug	120 NEMA 5-20P
Electrical Receptacle	220 NEMA 6-20R
Electrical Plug	220 NEMA 6-20R
Electrical Amps	120v 20 Amps
Electrical Amps	220v 10 Amps
Deck	1" Reversible Ultimate
Wax	No Maintenance

VARIABLE COMPRESSION TECHNOLOGY

Absorber	Rubber Dampeners
Number of Cushions	8

SAFETY

Shut off w/Tether	Yes
Large Safety Stop	Yes

PROGRAMS

Number Key Pad	Yes (MX-T3xi ONLY)
One Button Quick Start	Yes
Target Heart Rate	Yes
Fit Test	Yes
Intervals	Yes
5k Run	Yes

HEART RATE

Telemetry	Yes
Contact Heart Rate	Yes

CHAPTER 6: MX-T3x / T3xi TREADMILL SPECIFICATIONS, PARTS, AND ASSEMBLY GUIDES

6.3 MX-T3x / MX-T3xi MODEL ASSEMBLY STEPS

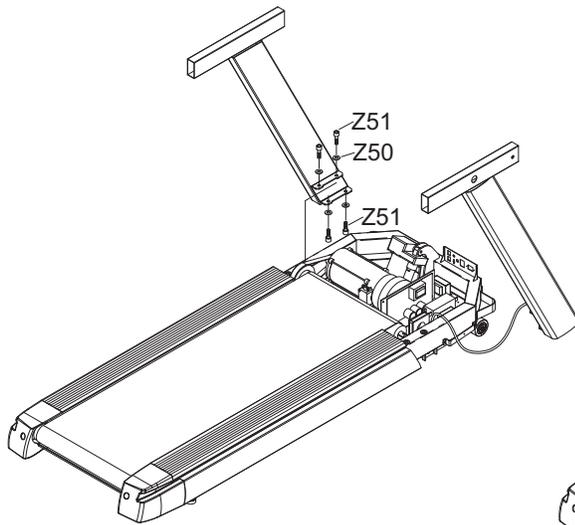

- **ATTENTION**

After installation is completed, the treadmill will need to be calibrated by using the AUTO-CHECK function. If this is not done, the treadmill's speed and incline values may be incorrect and damage the treadmill. Do not stand on the belt when performing the AUTO-CHECK function.

- **ASSEMBLY INSTRUCTIONS**

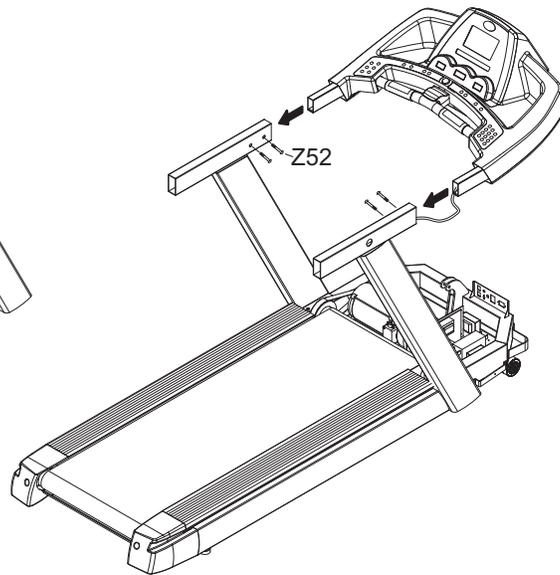

Please make sure that the power plug is not plugged into the wall outlet while completing the following procedure. To ensure correct assembly of the treadmill, carefully read and follow these steps:

STEP 1

Remove the motor cover. Pull out the console cable and route it through the Right console mast. Place the right console mast and then the left console mast in the console post support brackets. Secure the Right and Left mast with the 4 bolts provided (Z50, Z51). Make sure these bolts are tight.

STEP 2

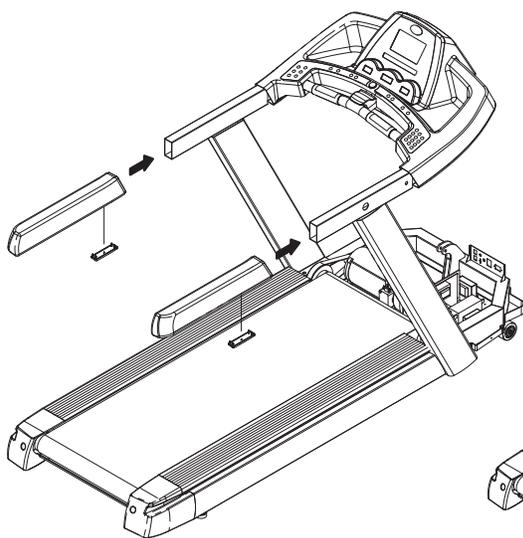

Connect the console cables from the console set to the motor control board cables. Secure the console set with 2 screws (Z52) on each side.

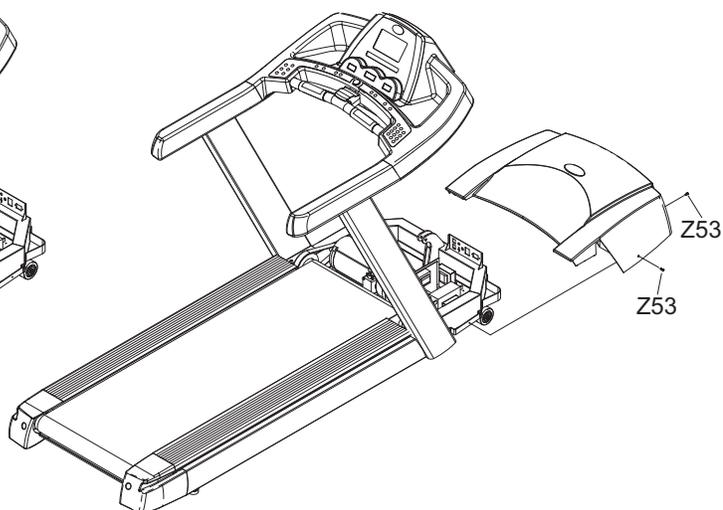

CHAPTER 6: MX-T3x / T3xi TREADMILL SPECIFICATIONS, PARTS, AND ASSEMBLY GUIDES

6.4 MX-T3x / MX-T3xi MODEL ASSEMBLY STEPS

STEP 3

STEP 4

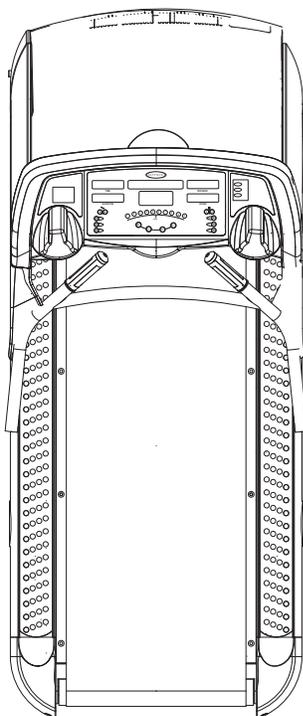

FINAL ASSEMBLY

AUTO CHECK

- Press and hold both incline “UP” and speed “DOWN” buttons simultaneously for 3 seconds. Then the “ENGINEERING MODE” is shown onto the console.
- Press the incline “UP” button to find the “AUTO CHECK” screen.
- Press the incline “START” button and then, the treadmill will run the auto check function automatically. This will take around 3 minutes to run.
- After auto check is complete “AUTO CHECK OK” will show on the console. Then, press **EMERGENCY STOP** key to back to initial starting screen.

CHAPTER 7: MX-T5x TREADMILL SPECIFICATIONS, PARTS, AND ASSEMBLY GUIDES
