### Equipment Wipe Installation to Dispenser & Dispenser Settings for Wipe Dispersal

11/26/2008 ml

**DO NOT** remove wipes from their plastic bag. Following are instructions for installation of the wipes into the dispenser.

Start by poking a small hole into the sealed plastic bag near the center of the roll. Feed your wipes from the center of the roll through the hole in the bag. Using the key provided, open the dispenser. Place the bagged wipes into the dispenser so that the wipe can feed through the dispenser. Flip the ring on the dispenser spout open to allow the wipe to be fed through. Once wipe has been fed through dispenser spout, close the dispenser. You can adjust the number of wipes allowed to be pulled using a coin or the key. The dispenser allows for the wipes to be fed 1 at a time or as many as 5 at a time.
